HOSPITAL PROFILE

The Children's Hospital Zhejiang University School of Medicine (ZUCH) is the largest comprehensive center of pediatric health care in Zhejiang Province with more than 60 years' history. Its predecessor was initially established in May 1951 as "Zhejiang Provincial Maternal and Children's Hospital" led by Professor Li Yuhua, a well-known pediatrician in China as the founder and the first director of the hospital. Currently it shoulders the responsibility for pediatric medical care, teaching, research, preventive healthcare, and public health emergencies for the whole Zhejiang Province. Annual out-patient visits sum up to 2.08 million while annual in-patient visits are nearly 46,000 and annual surgery cases amount to 20,000.

Welcome

Dear colleagues and friends,

It's our pleasure to announce that 'International Symposium on Neonatal Intensive Care Medicine' is to be held on October 15-17, 2015 in Hangzhou, China. This meeting is sponsored by The Children's Hospital Zhejiang University School of Medicine and Loma Linda University USA and jointly provided by The Subspecialty Group of Neonatology, Pediatric Society, and Chinese Medical Association.

The topics of this meeting will focus on 'the newborn lung', 'Infant nutrition', 'Quality improvement of neonatal care'. International expert speakers from different countries have been invited to lecture and discuss the latest progress in the field of NICU. This conference will provide an opportunity for all participants to exchange knowledge and share experiences.

Endowed with a pleasant climate, picturesque surroundings, Hangzhou is an ideal place for visiting in October. We know that you will enjoy both academic exchange and sightseeing in Hangzhou. We want to welcome your attendance at this conference. Your participation and contributions will make this forum more successful.

We are looking forward to meeting you in Hangzhou.

Sincerely,

Lizhong Du, MD

NICU

Neonatology is a national key specialty and key discipline of Zhejiang Province. Prof. DU Lizhong, a well-known neonatologist is the Chairman of Chinese Pediatric Society Section in Neonatology. The Neonatal Intensive Care Unit (NICU) was founded with the support of Project HOPE from the United States, which is one of the earliest NICUs in mainland of China. NICU is the first one to apply pulmonary surfactant, nitric oxide inhalation and neonatal ECMO to treat diseases. The survival rate of the very low birth weight infants surpasses 90% and the infant with lowest birth weight was only 550 gram. NICU takes lead in the treatment of respiratory distress syndrome, management of very low birth weight infant, and clinical research in premature infant brain damage. NICU is also responsible for the transport of the critically ill neonates in the whole province. Over the years, NICU with 60 beds has become the national important training base for neonatal intensive care in China.
